

Vignette: a snapshot of your applied project experience

Name: Brent Floyd

What was your project title?

“A study into user acceptances, preferences and performance of a virtual learning environment in higher education. “

What is your discipline/area of professional practice?

Lecturer in I.T. & Computing.

Why did you need to do this project at the time?

To enhance my knowledge and skills in eLearning.

What technologies did you use?

Website design and creation to facilitate traditional teaching/learning.

What were the main challenges in your project? How did you overcome them?

To create academic work from practical teaching methods. Study and practice.

What was the outcome of your project?

Every course that I teach has an accompanying website.

What is happening now? Has it developed since? How?

As above. It appears to be liked by students.
