

Vignette: a snapshot of your applied project experience

Name: **Mirasol Isorena**

What was your project title? **A short tutorial: Getting to know your Smart board Interactive Whiteboard.**

What is your discipline/area of professional practice? **I was trained in childcare and I have experienced, trained and qualified in Information Technology back in the Philippines.**

Why did you need to do this project at the time? **I needed to do this project at the time because DIT Colleges bought Smartboard Interactive Whiteboard and a training programme for academic staff was required. I wanted to illustrate the use and potential of the technology for Higher Education practitioners.**

What technologies did you use? **I used the software – Macromedia Dreamweaver, Camtasia Studio and Notebook Software.**

What were the main challenges in your project? How did you overcome them? **The main challenge was the software – Notebook software and Camtasia Studio which I had never tried or used before. I downloaded the software and studied it, practiced with it, and set up a series of examples ranging from basic to complex. My patience and perseverance helped me to overcome the challenges.**

What was the outcome of your project? **The outcome of my project according to the participants in the study was positive and emphasised the technologically impressive features of the Interactive Whiteboard.**

What is happening now? Has it developed since? How? **At the moment am awaiting further user feedback on the project and research.**
